U.S. MEDICAL CENTER FOR FEDERAL PRISONERS  
SPRINGFIELD, MISSOURI

GENERAL SURGERY CONSULTATION

COLE, Garrick  
Reg. No. 25462-076  
March 25, 2014  
WARD: S03

ATTENDING PHYSICIAN: Wade T. Jordan, MD / Samina Rao, PA

**REASON FOR CONSULTATION:** Patient is a 42-year-old male with end-stage renal disease currently on hemodialysis through a right IJ tunneled catheter. Patient has a history of CAPD in the past. He was on it for five to six months and the catheter was subsequently removed in October 2013, because of inability to provide that service.

**PAST MEDICAL HISTORY:** History of diabetes, hypertension, and hyperlipidemia.

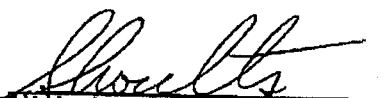

**MEDICATIONS:** Per BEMR.

**ALLERGIES:** No known allergies.

**REVIEW OF SYSTEMS:** Noncontributory.

**PHYSICAL EXAMINATION:** Patient appears his age. HEENT - negative. Chest - clear. Heart - regular. Abdomen - soft. Patient has what appears to be a previous exit site on the left side from a CAPD catheter and what may be an umbilical hernia repair at the same time. Extremities - negative.

**IMPRESSION/PLAN:** Would plan for a laparoscopic placement (LAP) continuous ambulatory peritoneal dialysis (CAPD) catheter with immediate exteriorization given the fact that he is on hemodialysis with a right internal jugular (IJ) catheter.

  
Nicholas F. Shoults, MD  
Consultant General Surgeon

Note Date: 05/28/2014 14:31	Provider: Le, T T PA-C	Unit: V02

Procedure encounter performed at Operating Room.

**Administrative Notes:**

**ADMINISTRATIVE NOTE 1**

**Provider:** Le, T T PA-C

Pre-Op Dx: ESRD on CAPD w/functioning PD Catheter

Post-Op Dx: Same

Intended Procedure: Removal of Right Tunneled Dialysis Cath

Procedure Performed: Removal of Right Tunneled Dialysis Cath

Performed by: T. Le PA-C

Anesthesia: Local- 1% Lidocaine w/Epi

Assistant: RN/ S. Downey

Surgical RN: RN/ T. Wootrin

Time out performed prior to procedure and informed consent was obtained, risk vs benefit explained. Area in right anterior chest prepped w/ Chloro-prep, draped w/sterile towels, injected w/1% lidocaine w/epi x 7ml and local anesthesia was attained. Entrance enlarged by 2mm w/ #15 blade, entrance bluntly dissected w/hemostat, extraction tool placed over cath and cuff freed from tissue. Cath removed in whole while inmate performed Valsalva maneuver, pressure applied x 10 min. Benzoin, steri-strips, and pressure gauze dressing applied. Inmate tolerated procedure well, inmate informed if any issues arise to notify any medical/nursing staff.

Findings: Intact catheter

Complications: None

Specimens: None

Condition on Discharge: Stable

EBL: <5ml

Disposition: Discharged to Housing Unit

**Copay Required:** No

**Cosign Required:** No

**Telephone/Verbal Order:** No
